## See the upside to finishing homes top to bottom.

Our soffits may look like they're hanging around just taking it easy, but they're always working their fascias off. They protect the hard-to-paint areas of roof rafters by showing mold and mildew the door. They increase ventilation and keep insects out of attics. Plus, they never need painting, are virtually maintenance free and their low-gloss woodgrain, brush and matte finishes complement any architectural style.
